

Industry Equipments

 **AIRCOM**

Industry

We develop products for:

- metal industry
- forging and molding industry
- agriculture
- installation on automatic robots

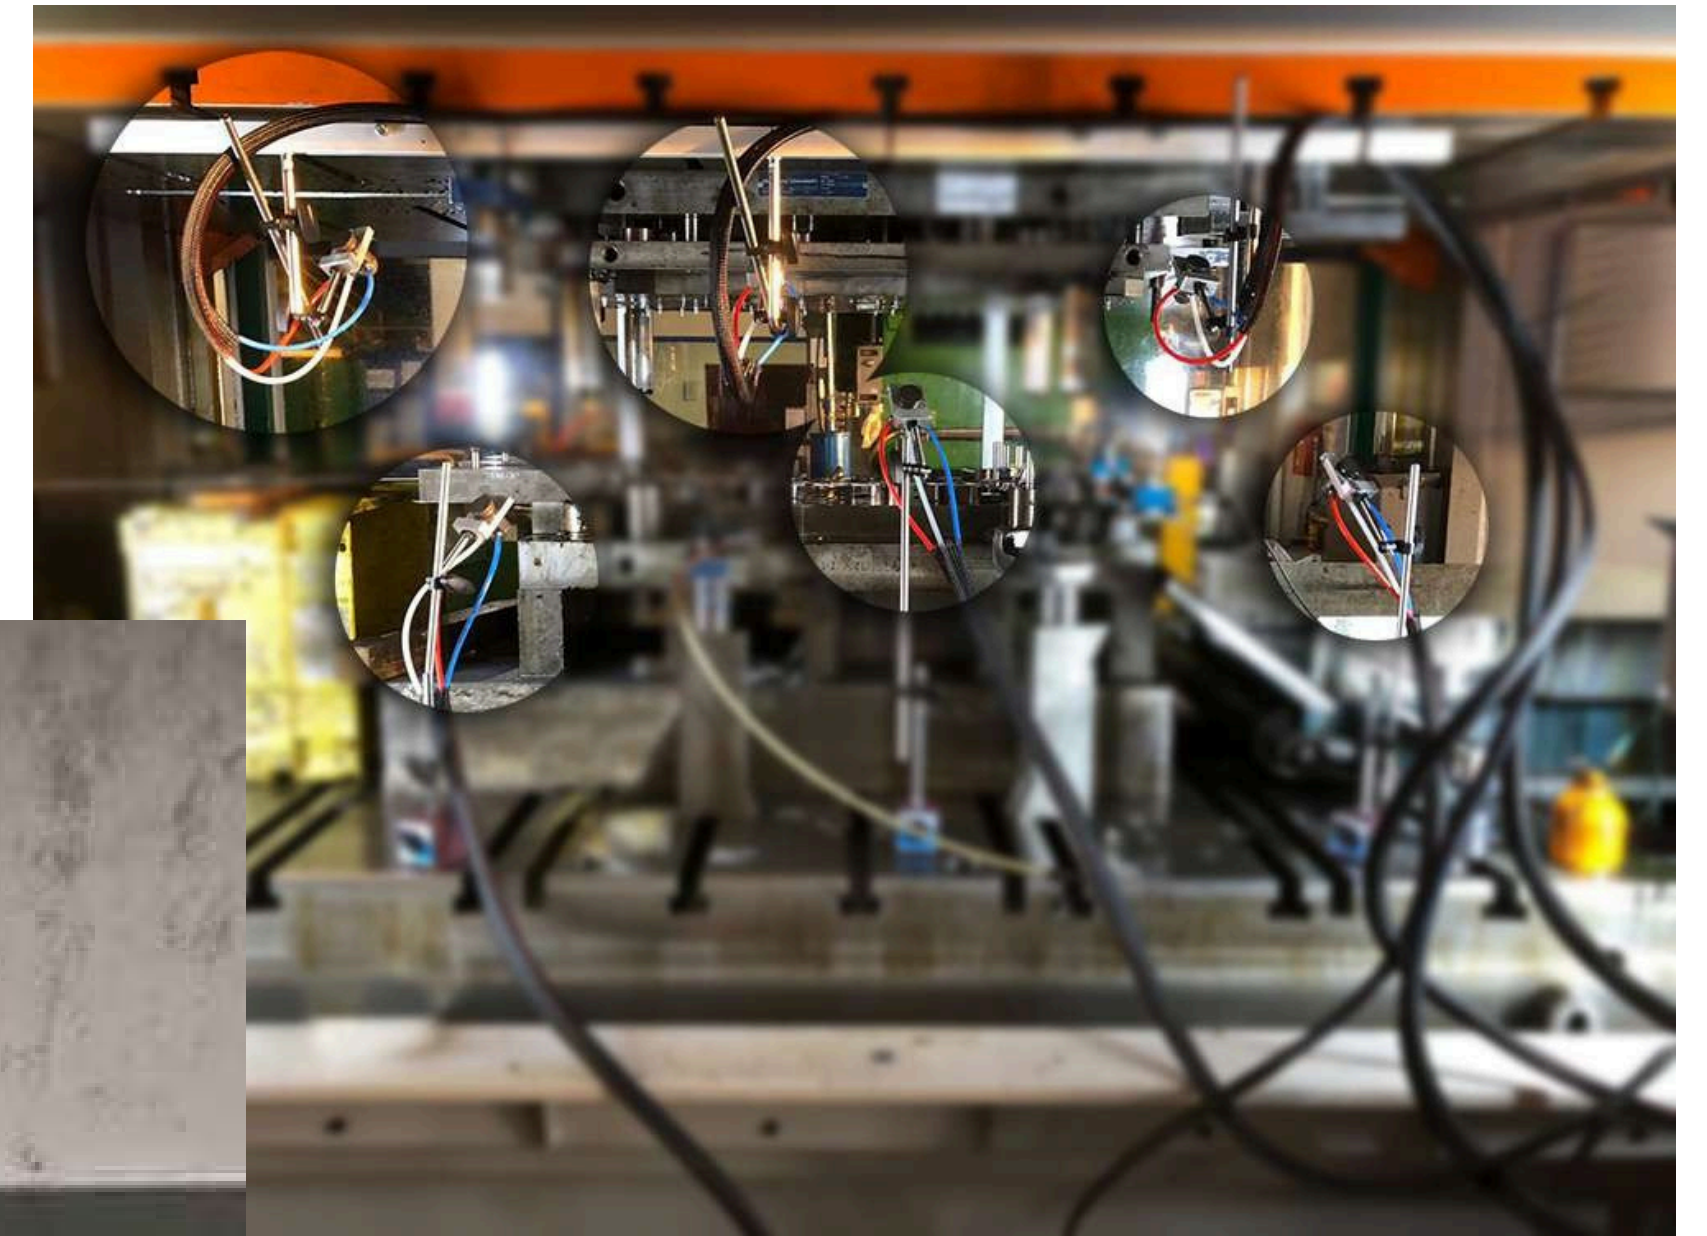

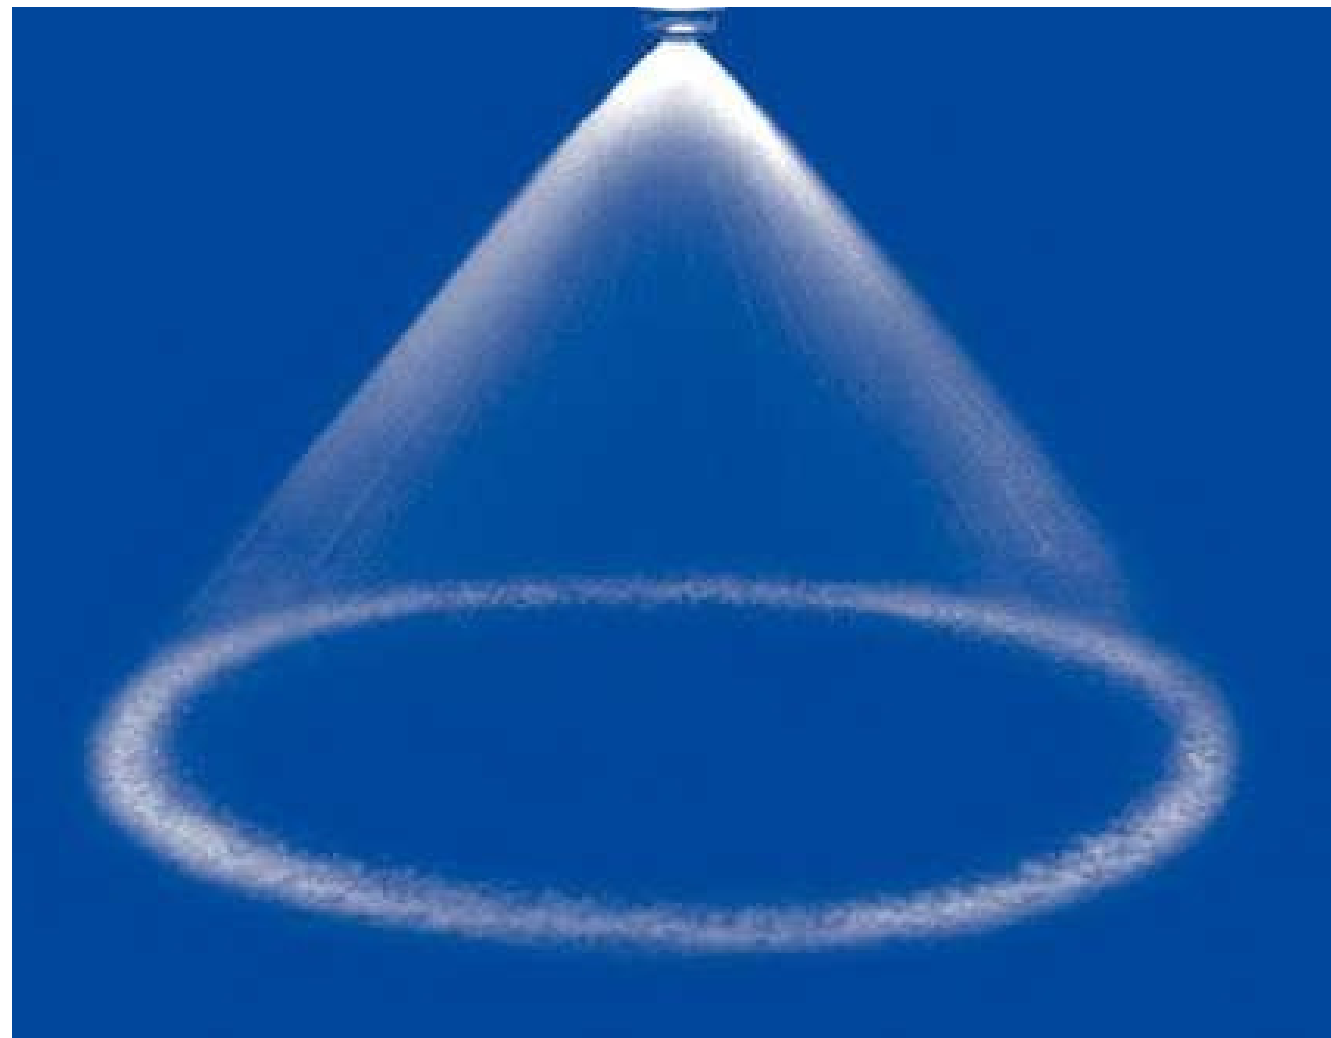

Industry

We design technologies to:

- spray lubricants
- apply adhesives
- spray glues
- apply release agents

Our R&D department is committed to the **personalization** of a product according to the customer's needs.

Hollow Cone

Produce a hollow cone pattern with a ring-shaped area.

Flat Spray

Flat spray nozzles produce a flat or sheet-type spray pattern.

Full Cone

Produce a cone-shaped spray pattern with a round impact area.

Spray Equipments

 **AIRCOM**

The company

We are a 50 years old
Italian company

It all started in 1967 thanks to an
entrepreneur who produced equipments for
leather finishing

We are specialized
in automatic spraying
equipments

Our R&D office and our production
mainly focus on automatic spray guns

We design, produce
& assemble 100% in house

Our products all start from *100% Made in
Italy* materials and they are certified from  **Fraunhofer**

We are located in an area with high
technological know-how

The Piedmont region integrates 100% of the most
advanced technological knowledge.

the original made in italy

Values

OUR VISION

We want to build tools that allows any company all around the world to atomize fluids in an excellent way

OUR STRENGTHS

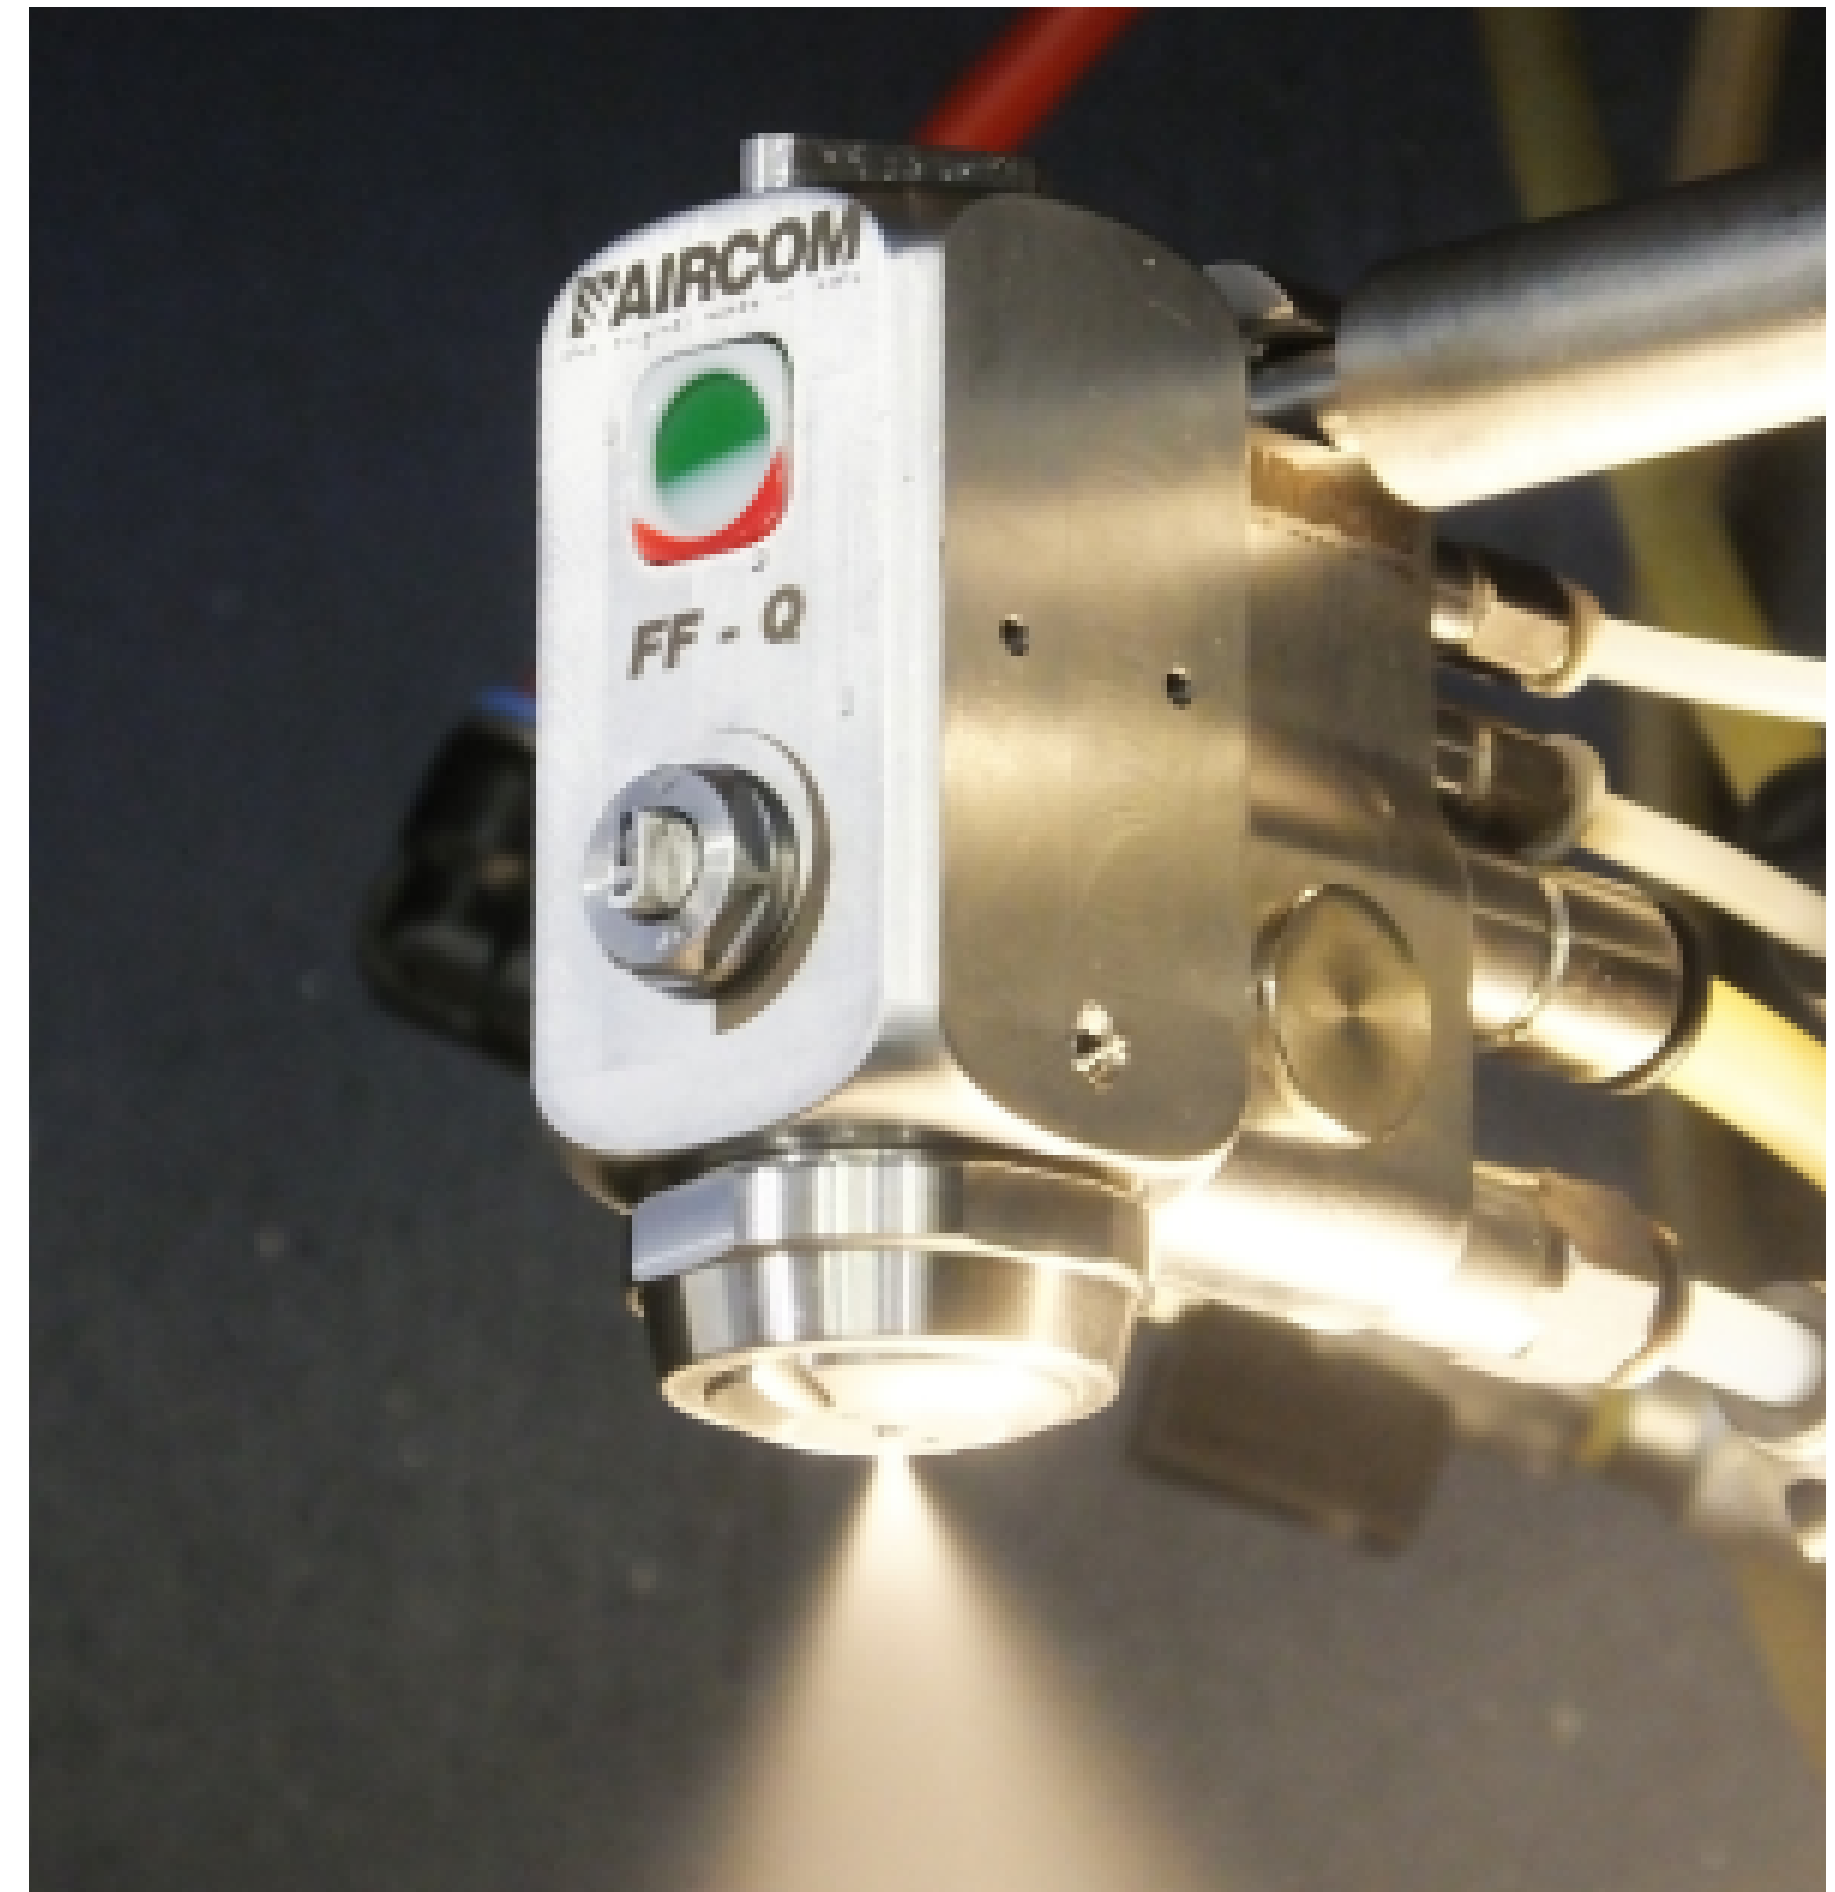

- Ease of maintenance
- Continuous research
- Made in Italy
- Product customization

OUR MISSION

We are committed to always design and develop more innovative and high performing and simple-to-use products

OUR MILESTONES

- Customer service
- Strongly specialized
- An passionate team
- Problem solvers

Innovation

We invest in production innovation to:

- design technologically advanced products
- guarantee precision and reliability

Automatic Guns

Discover our automatic spray gun models, including Conventional, Airless, HVLP and Special ones.

Accessories

Discover the accessories for your spray guns: find out how to reduce the time and costs of the coating phases.

Spare Parts

Discover the spare parts for your spray guns: find out the right component for your product.

Complete Systems

Find out how we can help you get a complete system, ready to use.

Conventional

High adaptability to different types of processing, designed to meet the needs of different markets.

HVLP

High air flow and low outlet pressure to reduce the number of passes during painting.

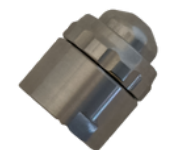

Heated

Heat the gun body up to 45°C and maintain the temperature to ensure perfect atomization of hot fluids.

Special

Highly adaptable to different types of processing and are designed for spraying particular fluids.

Sectors

Automotive

AIRCOM® offers solutions for different applications in the automotive sector, ensuring uniformity of finishing and saving on production costs.

Glass

AIRCOM® guns make the finishing of bottles and flasks easy to achieve thanks to the precision of the spray jet, the regulators and the low overspray, guaranteeing a uniform, long-lasting and precise painting, without loss of paint.

Industry

AIRCOM® offers solutions for any type of application, guaranteeing durability over time, quality in atomizing and the possibility to customize the solution according to the characteristics of the final industry.

Leather

AIRCOM® spray guns guarantee an excellent finishing on all types of leather, whether of bovine, ovine and caprine origin, or exotic leathers.

Pharma & Food

AIRCOM® spray guns intended for the pharma & food sector have internal components in suitable, certified materials and guarantee easy use.

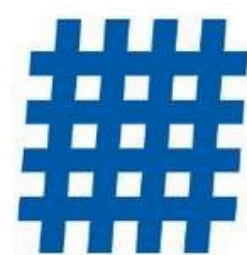

Plastics

AIRCOM® spray guns guarantee a long-lasting and precise coating without paint loss. Spraying is made easy thanks to fan adjustment and low overspray.

Textile

Spraying on textile surfaces is made easy with AIRCOM®'s products: by spraying waxes, adhesives, protective liquids, or color, it is possible to obtain customized finishes for everyday textile objects.

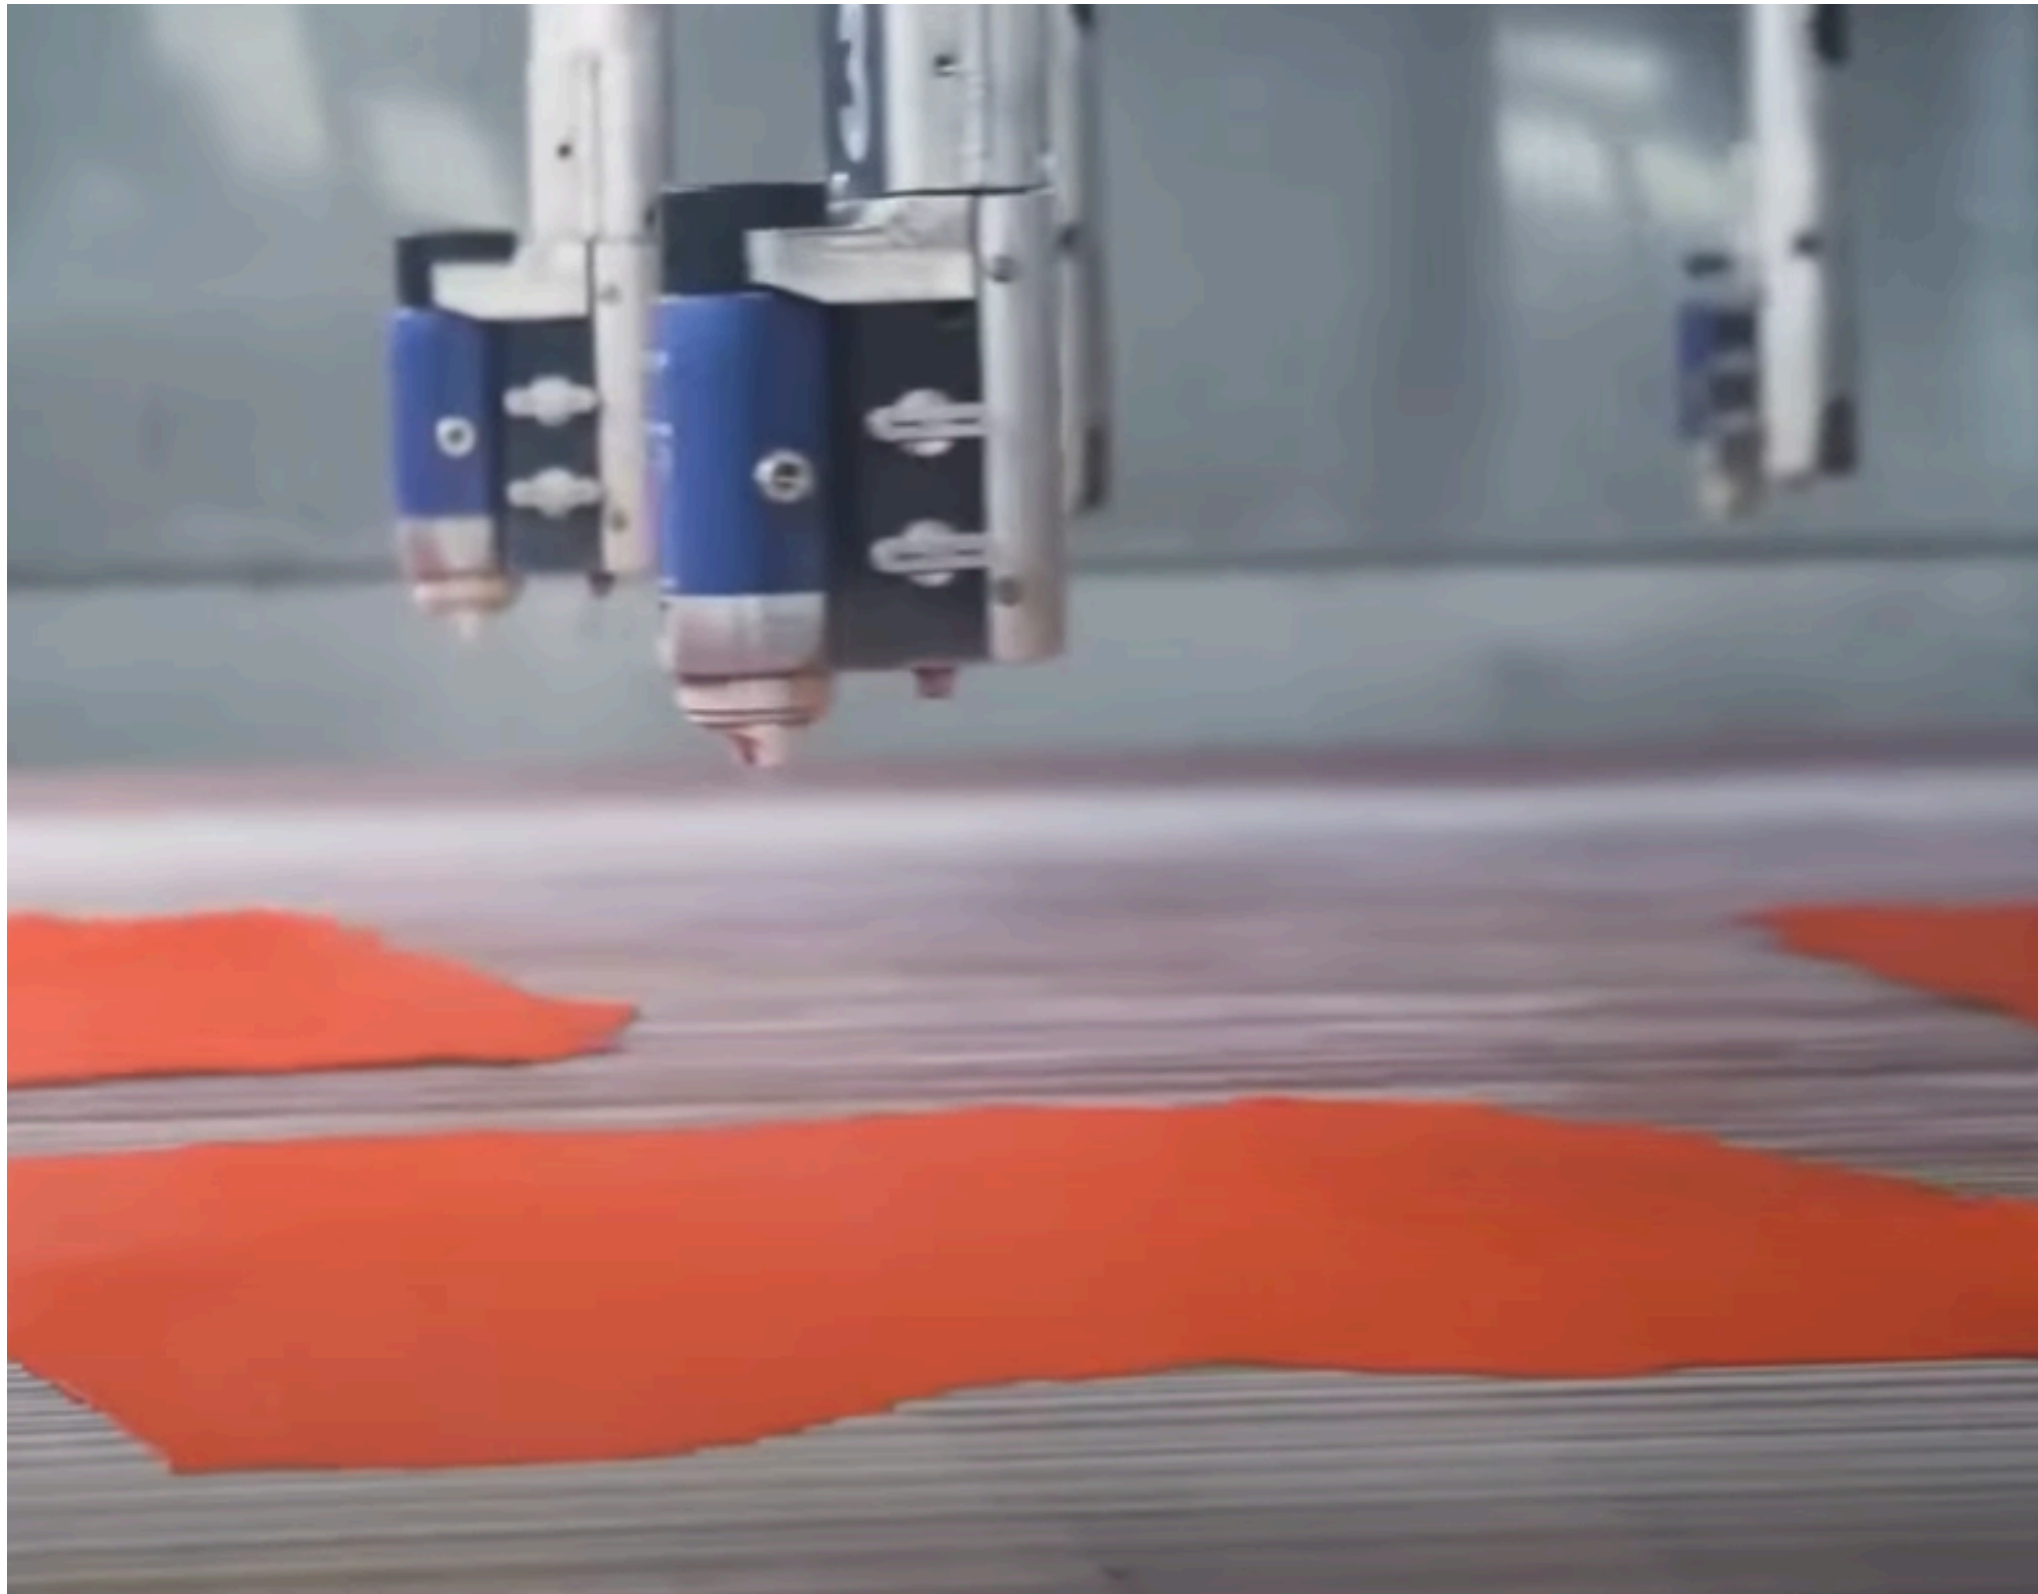

Wood

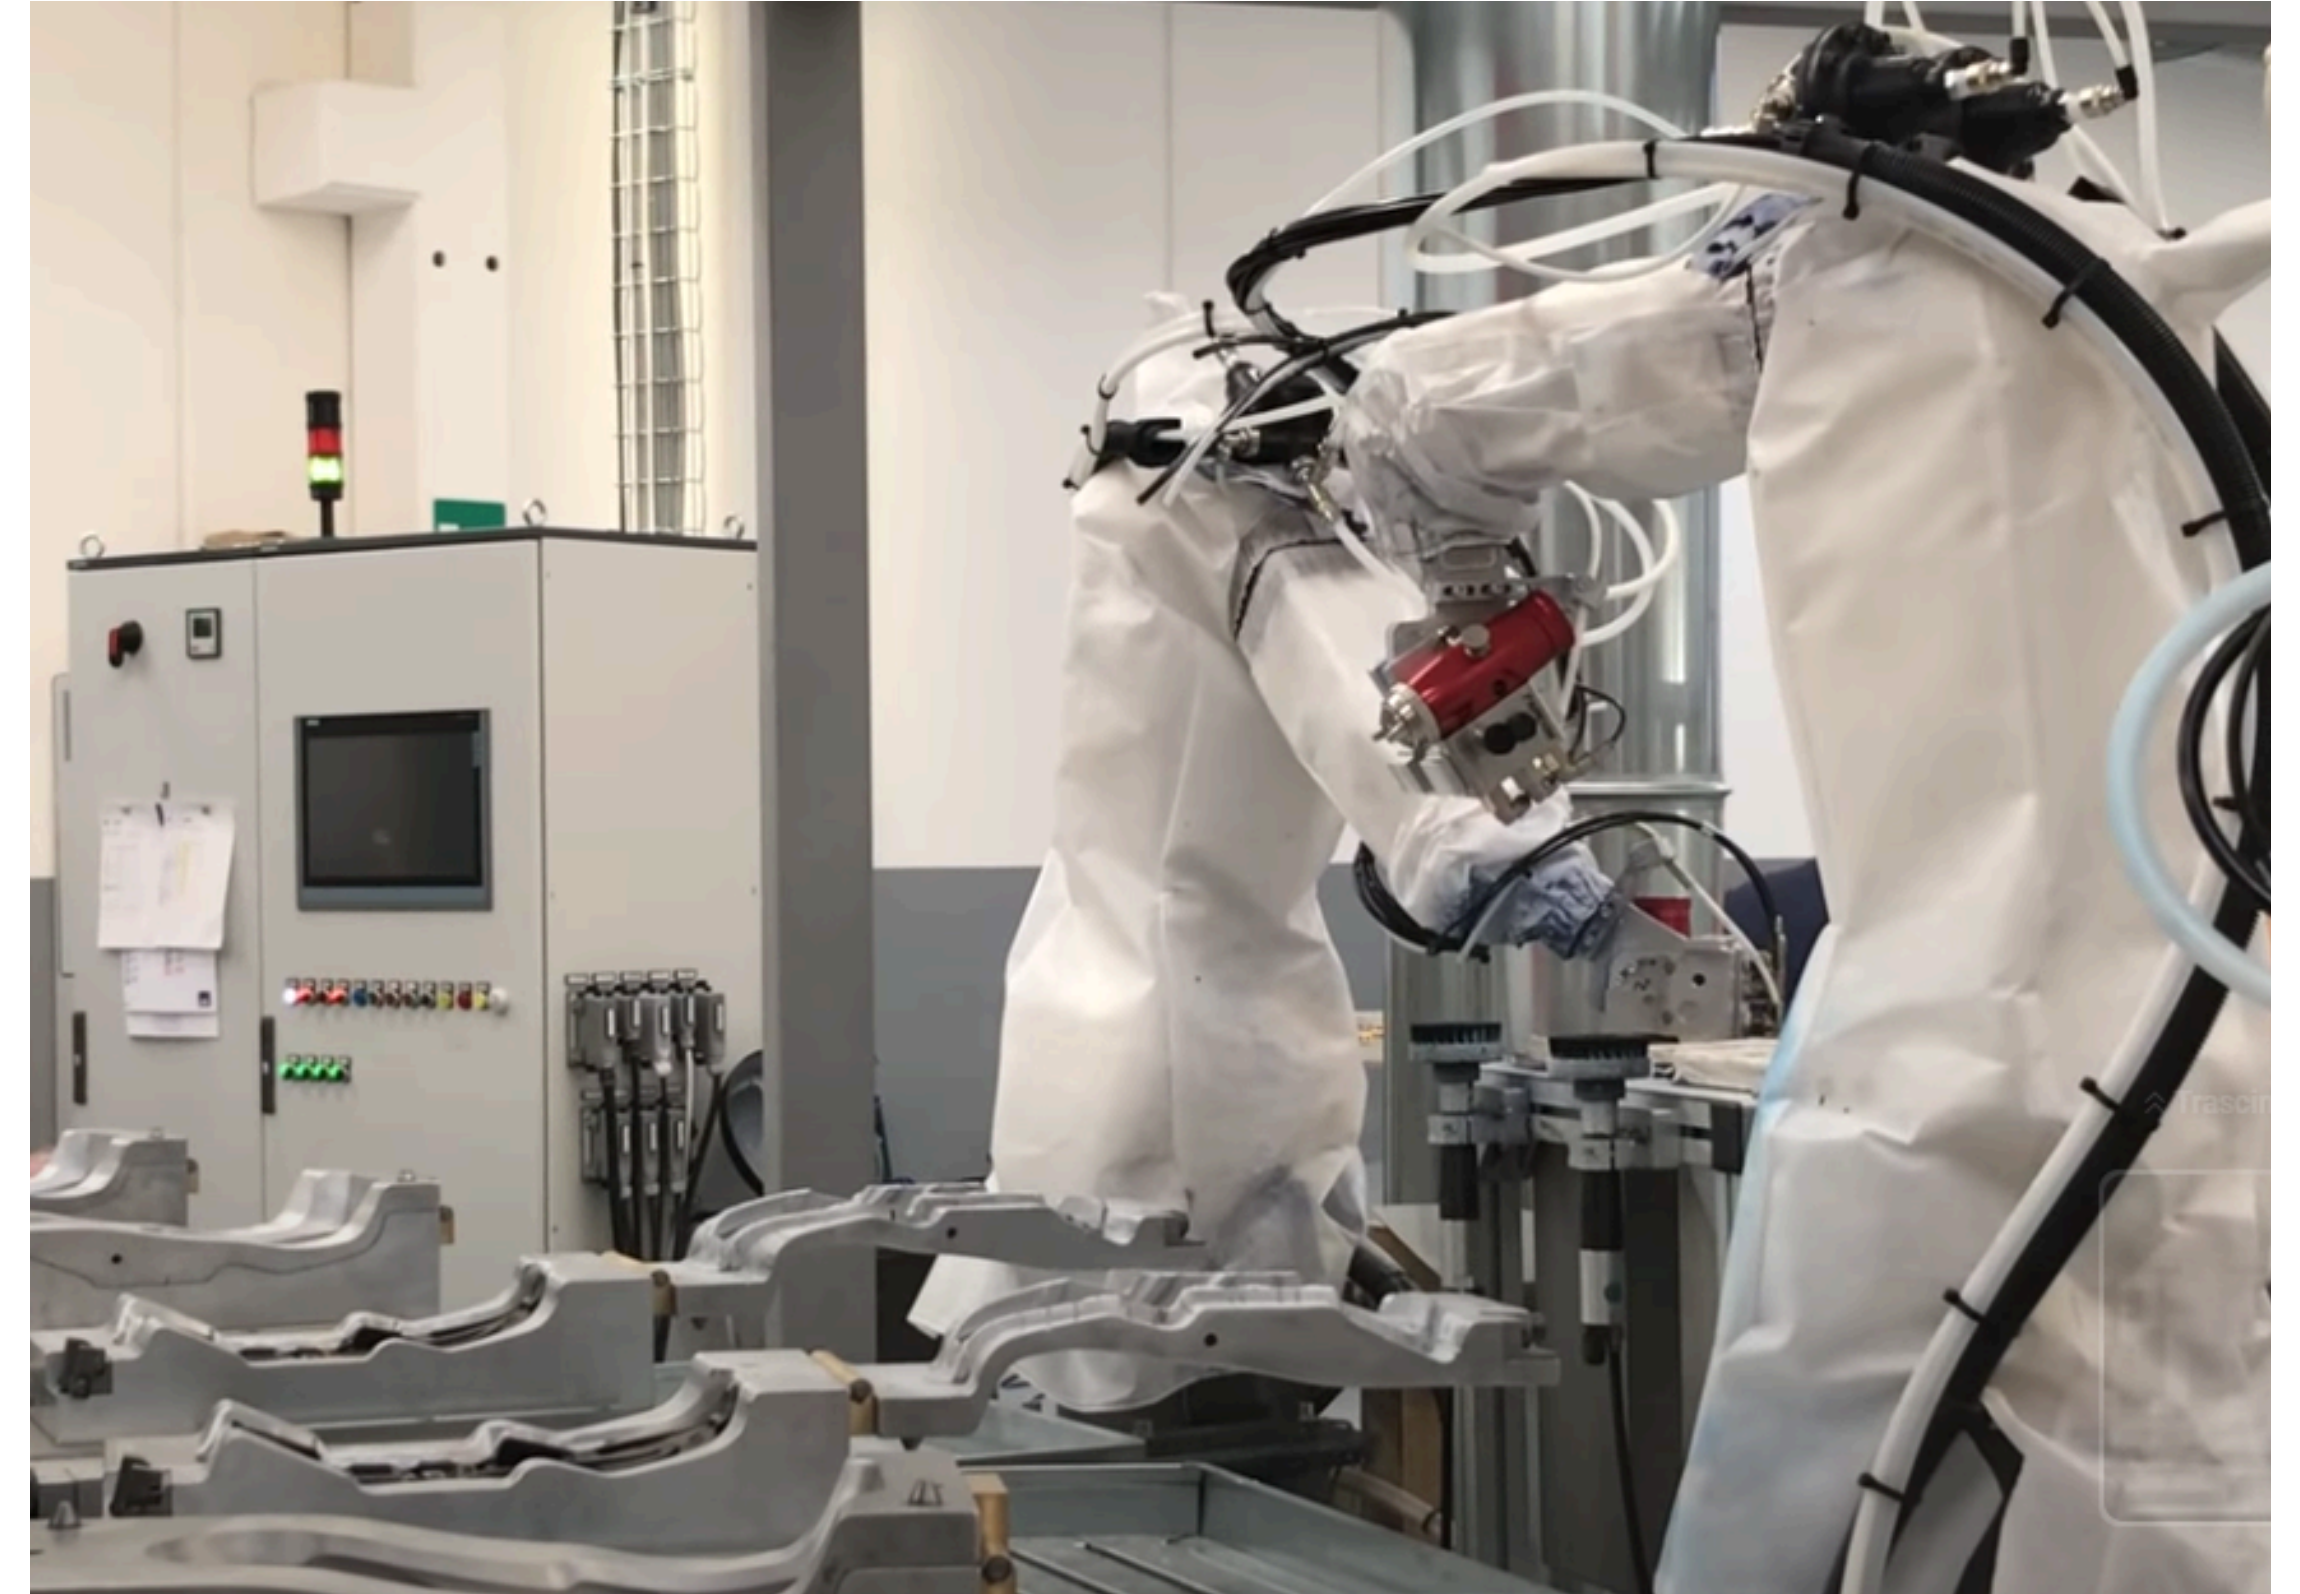

AIRCOM® spray guns enable the spraying of coatings, primers, and protective liquids, thereby enhancing the wood surface.
